### What People Have Said .....

"I've been speaking professionally for over 16 years spending thousands of dollars in various websites that never worked as advertised from supposedly top flight designers. For an investment of a regular chapter meeting, Lenny Laskowski provided specific & powerful tools and techniques that made immediate massive positive impact on my website. He also provided a remarkable format for a reliable internet marketing tool. This is one of the NSA speakers every chapter should have on their "must come here" list.
